Whole Number 348

The Lutheran Church and the Origin of the Universe

Has the world spontaneously evolved during periods of millions of years? Have the species evolved through natural selection and the survival of the fittest? Are the different forms of life a result of different environments? Is the ape the progenitor of man? or is he, as evolutionists now maintain, a brother to man, having a common ancestry with man?

Lutherans regard the evolutionary theory of the origin of the universe and the species as a THEORY; as an explanation of origin which does not explain origin. Having observed the demoralizing effect of this God-less theory based on the supposed age of rocks, Lutherans prefer to pin their faith on the Rock of Ages. They continue to teach and believe: In the beginning God created heaven and earth. Genesis 1-1. The universe and the species are a result of the Divine fiat. "And God said: 'Let there be....' And there was."

Through faith we understand that the worlds were framed by the word of God. Hebr. 11-3.

Monday, April 18.
(EASTER MONDAY)
BARTH'S ORCHESTRA

LOCAL NEWS.

Mr and Mrs J F W Ulmer left Friday morning for Vancouver. Mr Ulmer intends to engage in fruit farming in the Coast provinces.

Mrs Aimer Anderson (nee Kullander) underwent two major operations last week, in the Misericordia hospital, and is now making a very satisfactory recovery.

Mr and Mrs John J H Ulmer were Edmonton visitors on Monday.

Mr John Miller visited Edson this week.

It is understood that Mr E Golz, the popular teacher at St Matthew School No. 1, is retiring from his position at the Easter vacation, and intends returning to his native city, Chicago. Mr Golz will resume his studies at the University, which were interrupted on his coming to Stony, to teach.

Mr Griggs, who had been tinsmithing in Stony for about a year, moved back, with his family on Saturday, to their former home in Edmonton.

Mr Wm Newman left on Friday with his outfit for Oyen, Alberta, down in the dry belt. Mr Newman's health has not been of the best since coming to Stony Plain district owing to the high altitude, and so has returned to his old district on the Goose Lake Line.

While helping to unload a consignment of farm implements at his warehouse on 2d street, on Friday evening, Mr John H Enders had the misfortune to have the end of a heavy ceed drill drop on his foot, crushing it severely. His injury was attended to by Dr Oatway.

Mr Hyatt has a grievance! Ray had been planning a big Aquatic Carnival and Water Polo game on the Speakman Lake for Saturday afternoon next, when along comes Mr Feuersprize and pumps all the aqua pura to another part of the town.

Rev G Poetzsch of St Matthew Lutheran church, Spruce Grove, will hold Divine service on Sunday next, April 10, at 2:30 p.m. at St Oswald's church, Stony Plain.

At the meeting of the officers of the Hockey club the season's report was reviewed. The treasurer reported that the receipts and expenditures practically offset each other.

The prospects at the present time for a building boom in Stony Plain: the coming season seem fairly good, owing to the shortage of housing accommodation. Building operations have already commenced, in a few instances: Mr Rothe is building a bungalow on the C.N. right-of-way, and Carl Litke is erecting a small house on Second street east.

Quite a few local cases are already on the docket, to be tried at the coming sitting of the District Court in Stony Plain.

Too Late!

With the memory of the theatre holocaust, in which some scores of little children were the victims, still fresh in their minds, the citizens of Montreal are passing through another tragedy, an epidemic of typhoid fever which, at the time of writing, has afflicted over 1,500 people and resulted in over forty deaths.

The taking of proper precautions and the provision of necessary safeguards would have saved the people of Montreal from the sorrows of the theatre fire, and, in like manner, the present typhoid epidemic could easily have been prevented.

It is the same old story over and over again of locking the stable door after the horse has been stolen, and one is sometimes inclined to question whether human beings are, after all, so much superior in intelligence to animals. In the case of animals it is noticeable that once bitten they are twice shy, but humans go on repeating the same blunder time after time and pay large penalties in sorrow, suffering and loss.

Following the Montreal theatre fire an investigation was made into every theatre and hall of public assembly in the city to ascertain whether they were in a condition safeguarding the lives of those attending them. Practically all of them were found deficient in some respects; some were condemned and closed up. It should not have required a great catastrophe and the loss of many lives to lead civic officials to discharge a duty which should be rendering their attention all the time.

And now, when it is too late, investigation has established that the typhoid outbreak is the result of impure milk supplied to citizens. One man kills another and he has to face a trial for murder or manslaughter. In Montreal one thousand and more are lying on sick beds in homes and hospitals fighting for life, and more than two score are dead, all the result of criminal negligence.

In the case of this typhoid outbreak there is double neglect on the part of the health authorities. In the first place it was their sworn duty to safeguard the health of all citizens through the assurance of a supply of pure milk. That is one of the duties of a civic health department, and for the discharge of which they are paid salaries out of the taxes of the ratepayers. In the second place, medical science has placed in their hands the means of preventing typhoid, of rendering people immune from its ravages. Now that the epidemic is raging energetic steps are being taken to inoculate tens of thousands of citizens. When, in the case of many, it is devastatingly too late.

Not only so, but these emergency measures cost many times as much in effort and money as the day to day carrying on of this all important work would cost in the regular work of health administration. Why is it that municipal councils insist they cannot afford to expend money to protect the health and lives of their people, and then expend many times the required amount in a frantic endeavor to overcome the evil which through their shortsightedness has resulted?

And let not other places adopt a "holier than thou" attitude toward Montreal; rather let them examine their own municipal households. It is well established fact that smallpox, diphtheria and typhoid fever can be absolutely prevented and banished from our midst. These frightful diseases can be rendered as extinct as the dodo, leprosy or yellow fever. Yet they continue to stalk through the land claiming their thousands of victims every year. Why? Because of what amounts to criminal negligence on the part of health officials and people generally.

Our Western prairie provinces pride themselves in their work for the promotion of health, but they still have a long way to travel in the direction of the eradication of preventable disease. There is much educational work yet to be done, and it is sincerely to be hoped that provincial health departments, municipal councils and health officers, all doctors, and every organization interested in the health, happiness and well-being of the people will throw themselves unreservedly into the campaign now in progress at many points under the "Seymour Plan" for the wiping out of preventable disease. The community which does not engage in this warfare stands itself as hopelessly backward, and indifferent to the best interests and highest welfare of its people.

A good wife remembers a complaint paid her husband as long as she lives.

A stadium is to be constructed at Bologna, Italy, to seat 50,000 spectators.

CHILDREN CRY FOR

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Canada's Certain Destiny

Viscount Willingdon Says Dominion
to be One of the Great Nationalities of the World

Canada's certain destiny is to be one of the great nationalities of the world, a member of the British Commonwealth of Nations, but free and independent in its administrative life, Viscount Willingdon declared in an address before the Canadian Club at Victoria.

The Governor-General outlined his vision of the Empire, "an empire the like of which the world has never seen, an empire which, whatever pessimists may say, it is my firm belief that the more independent and free the various parts become in matters of administration the closer will be the ties of loyalty that bind them to the throne."

Britain, he said, is still full of life and vigor despite the troubles of post-war years.

Stomach Cramps Yield to "Nerviline"

When doled up at midnight with cramps you don't feel like experimenting; what you want is something to remove the cramp. Nothing can do so effectively as Nerviline. Take twenty drops in a little sweetened water, and quick as wink the cramp is gone. Nerviline is about five times as strong as most medicines, and because so strong, only a small dose is required to give instant effect. For stomach, gas, fermentation, cramps, etc., Nerviline should be kept in every home. For sure protection, get "Nerviline" today. 35c at dealers.

Found Millions But Received No Reward

British Officer Left Sick Bed to Locate
Wreck of Laurotic

No Admiralty recognition has come to Commander Geoffrey Unsworth, D.S.O., D.S.C., R.N.R., who located the "Laurotic," from which \$25,000,000 in bullion has been salvaged. Commander Unsworth, who is now in charge of a steamer trading between Dublin and the Continent, was a pilot in Irish waters and mine clearance officer of the Lough Swilly flotilla when the "Laurotic" struck.

He saved the ship's complement, but suffered so much from exposure that he was admitted to Londonderry Hospital. Admiralty expeditions failing to locate the treasure-laden vessel, Commander Unsworth insisted on leaving his sick bed to take part in the search. His knowledge of Irish waters enabled him to discover the wreck and buoy the spot, making possible the recent salvage operations, for which honors and reward have been generously bestowed.

The Admiralty apparently regard the commander's part as all in the day's work, for so far it has gone without recognition.

Externally or internally, it is Good. When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will soothe the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Documents are Guarded In Westminster Abbey

Some Historical Papers Date Back to
Eighteenth Century

The Muniment Room at Westminster Abbey contains a collection of historical documents that probably has no counterpart the world over. Closely guarded in locked, iron-bound chests, the papers kept there number over 100,000, and some of them date back to the eighteenth century. These documents are now being prepared and edited for publication, and Dr. Scott, the librarian of the British Museum, is making a careful record of 57,000 of the more important.

To have children sound and healthy as the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Many Vessels Wrecked

Ships Lost During Year 1926 Totalled
Three Hundred

A total of 291 vessels were lost in the world during 1926 by disaster at sea or on waterways.

The Bureau of Navigation has just made public its annual compilation on the subject, showing that 2,014 passengers were voyaging on the wrecked boats, of whom 175 lost their lives.

Among the vessels were 24 private yachts, the balance, 267, being merchant vessels or passenger ships.

British Doctors Urge

International Code

Would Remove Language Difficulties
in Wireless Consultations at Sea

An international medical code whereby remedies for diseases would be transmitted by standardized cone signals in the case of wireless medical consultations at sea between doctorless ships and those carrying doctors, is being urged by British physicians. By this means the difficulties of language differences are to be removed.

Newsprint From Wheat Straw May Compete With Wood As New Process Is Developed

What material may be expected to supplement wood in the event of the world consumption of newsprint attaining anything resembling the per capita use of this commodity in the United States, asks the Natural Resources Intelligence Service, Department of the Interior, Ottawa. Will it be esparto grass which has been used extensively in the past and is still being used? Will it be bamboo, which has been used to some extent? Or will it be straw? If the latter then Canada with its vast cereal-growing areas possesses great and permanent potential supplies. Straw material is looked upon as having great possibilities and recently a company was formed at Edmonton for the purpose of manufacturing paper from this commodity. If this mill succeeds it would justify a considerable and possibly a remarkable industrial development in the Canadian wheat fields.

Recent developments along similar lines in Italy may be of interest to Canadian agriculturists and capitalists, points out the Natural Resources Service. The problems of producing a straw which will fulfill all the technical requirements of satisfactory newsprint paper has been the subject of intense research on the part of Italian industrial chemists for a number of years. The problem is now thought successfully solved and straw pulp is being produced on an industrial scale in the plants of the Societa Elettrotecnica Pomilio in Naples and in those of the Societa Italiana di Elettrotecnica at Busi.

The latter mill which has a daily productive capacity of 20 tons, is now turning out approximately 10 tons of pulp a day for the paper industry. The Pomilio process has the further advantage of utilizing the chaff by-product in the production of electrolytic soda, which is a well developed Italian industry.

The problem of production costs has also been successfully solved, and the cost of production of newsprint paper containing approximately 80 per cent straw is claimed to be about 22 per cent less than ordinary newsprint paper, whose current price is about \$75 a short ton.

Experiments have found paper with an 80 per cent straw and 20 per cent wood content suitable for printing purposes. Samples of the editions received show the paper to be of good quality and excellent color, but somewhat harder in finish and less absorbent to ink than the newsprint in general use in the United States and Canada. The paper is also slightly less opaque, and the printed sheet does not appear to have the clearness characteristic of American newspapers.

Meanwhile Canada maintains her position of the world leading country in the export of both wood pulp and wheat, and her pulpwood and cereal-growing resources are so outstanding as to justify the opinion that she will remain the predominant factor in newsprint supplies no matter whether the final honors go either to spruce or to wheat straw.

Sprouting Potatoes

This Method Results in Forwarding the Crop About Seven Days

Tests at the experimental station indicate that potatoes can profitably be planted at any time between May 1st and June 15. After the latter date the result is poor. It was also found that sprouting forwarded the crop seven days. Early Northern sprouted planted May 15 was ready August 3rd, non-sprouted planted the same date was ready August 10. The yield of sprouted was 22½ tons per acre and of non-sprouted 20½ tons. When the results as regards time of readiness were the same, but the non-sprouted yielded slightly better, the record being sprouted 27½ tons, non-sprouted 25½ tons. Sprouting effected by placing tubers in a warm dimly lighted building three weeks prior to planting. Strong sturdy shoots about half an inch long were the result.

An envelope is like a woman; it can't go anywhere without address.

W. N. U. 1675

Alaskan Reindeer

More Than Half a Million Roaming the Northern Tundra

Reindeer, originally introduced into Northern Alaska to ward off starvation of the Eskimo, today presents a problem which is commanding serious attention of Government officials and private citizens alike.

The herd of 1,500 imported into the territory in the 10 years prior to 1902, has multiplied so rapidly that it is estimated that more than half a million are roaming the northern tundra. On the present basis of increase, within 10 years, it is expected the number will approximate 5,000,000, the maximum that can be grazed successfully, say Government experts.

The problem of what to do with the fast multiplying herds is one for which no satisfactory solution has yet been found. Marketing the meat in the United States has been undertaken, but difficulty has been encountered in popularizing it as a food. Not that it is less palatable than beef or other meat, those interested assert, but the housewives are slow to try a hitherto unknown commodity.

A School for Freed Slaves

Abyssinians has been much blamed for her backwardness in fulfilling her promise to abolish slavery within her borders. There is news, however that she has at least made a beginning. Through the British African Office her Regent, Haile Selassie, has secured the help of the Anti-Slavery Society in setting up a school in the Abyssinian capital for poor children and freed slaves.

A Smart Daytime or Evening Frock

Charmingly youthful is this chic frock having shirred side sections, thereby adding grace. View A shows the frock suitable for daytime wear, with the cuffs finishing the long darted sleeves and shaped collar simply bound. View B has the neck cut to a V in front and a lace vestee added, and the sleeves omitted. A note of contrasting color may be introduced by the flowers placed at the right shoulder and left hip, making this a particularly attractive frock for evening wear. No. 1516 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 yards 39-inch material, or 2½ yards 44-inch. View B requires 1½ yard 3½-inch lace for vestee. Price 20 cents the pattern.

Our Fashion Book, illustrating the practical and graceful styles will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Time Ball No Longer Needed

Greenwich Time Is Now Picked Up by Wireless

For two generations the Signal Tower at Deal has given the time of day to passing ships by the dropping of its Time Ball. Now the tower is to be closed and the ball will drop no more.

No one seems to know the tower's age, but in the old days it was used for semaphore and flag signalling to the ships lying in the roads between the shore and the Goodwin Sands. It was the last of a chain of signalling stations from the Admiralty in Whitehall.

With the coming of the telegraph the chain was no longer needed, and about 1852 the tower was put to a new use. It must have seemed a marvelous thing then that an electric current from Greenwich could release this huge ball, a hollow size drum six feet across, at the very moment the clocks of London were striking one. Outgoing ships must have found it invaluable for setting their chronometers.

Now in the Wireless Age, it seems less startling to us that Greenwich time can be picked up anywhere. Wireless has put the Time Ball out of business, and the Signalling Tower is pensioned off, its work done.

The Time Ball was raised by a wheel worked by hand a few minutes before the hour, and when the electric current released it its fall was broken by compressed air, a rubber cushion, and six strong spiral springs. All that has now been done for the last time, for the ball ceased to work recently.

Discover Colossal Statue

Part of a colossal statue, believed to be of a Roman emperor has been discovered at Elouadi, near Athens. Only the head and bust have been uncovered. The statue is of great beauty. According to the size of the head and bust, which have a total height of more than two and a half yards, the whole statue is about five and a half yards high.

It has been claimed that 2,000 tons of dust per square mile were recently deposited in the vicinity of Loran, Wyoming.

Canada Holds Leading Place As Best Country in World For Raising of Domestic Fowl

First Dominion Day

Events of 1907 Are Recalled by Toronto Club Driver

While preparations are going forward to make the celebration of Canada's 60th birthday, next July 1, a memorable event, 61-year-old Charles Abbott, probably Toronto's oldest cab driver, recalls the doings of the first Dominion Day—1867.

On that momentous day Mr. Abbott's cab had been engaged by Alderman John Carr, chairman of the Toronto Fireworks Committee. Mr. Abbott still retains vivid recollections of the modest fireworks display in Queen's Park that closed Dominion Day.

A feature of Toronto's celebration of the first Dominion Day, Mr. Abbott recalls, was the military review of the Royal Artillery and Body Guard.

A Mechanical Thinker

French Inventor Solves Troubles of the Busy Executive

A mechanical thinker to remind office executives of their appointments and tasks, has been invented in France.

It stands on the business man's desk. As he makes a memorandum of an order, appointment or idea to be executed at a certain time he throws back a lever on the machine, to indicate the hour, day and month of the event. When the time comes, even if it is a year later, a light goes on and a bell rings.

The executive looks at the clock in the machine, notes the time it registers, runs down the memorandum sheet to the indicated time and reads his own instructions to himself.

"You must be growing tired of me," said Mr. Newlywed. "You never call me 'dear' as other men's wives do." "Do they?" she demanded suspiciously.

Old Trade Flourishes in New Land

An old trade flourishes in a new land. Hand loom weaving has been successfully introduced at Denzil, a small Saskatchewan town along the lines of the Canadian Pacific Railway. The keen enthusiasm in hand loom weaving at Denzil, and the general interest throughout Saskatchewan can be traced to the energy of Rev. Father John Schultz, and comes as the result of his recent visit to Great Britain, France, Germany, Belgium, Switzerland and Italy. He introduced hand weaving in each country, studied the art himself, and on his return installed the looms.

Father Schultz believes that the industry will foster home life in the rural districts, and will particularly encourage new settlers by providing them with a touch of the daily routine to which they were accustomed prior to their arrival in this country. Weaving is regarded as the nucleus around which other farm activities will prosper. This activity creates a demand for sheep raising, and hemp and flax growing. Another feature, and one highly regarded, is that weaving may be undertaken by members of farm families unable to carry on with the heavier duties of rural life.

Why is Canada the best country in the world in which to raise domestic fowl of all kinds? This is the question that many thousands of people who do not live in the Dominion, are asking themselves. They have been led to propound this query because of the magnificent display of birds made by Canada at the World's Poultry Congress in Spain in 1924, and also because of the fact that Canada holds the world's egg-production records both for a pen of ten hens and for an individual hen. As a consequence they will gather in Ottawa for the third World's Poultry Congress from July 27 to August 4, 1927.

A good many Canadians may feel that because they do not know one breed of poultry from another they have no interest in this gathering, but, if so, they miss both its national and personal significance. In Europe, particularly in Great Britain, the advancement in poultry breeding is largely due to the personal and financial assistance given by leading officials. His Majesty King George, and the Prince of Wales (both of whom will have exhibits at Ottawa) are amongst the outstanding poultry breeders in the Empire, and their example is followed by hundreds whose purpose is patriotic and philanthropic—persons who are interested in birds because they are more keenly interested in men. It is expected that the Congress in Ottawa will be attended by about seven thousand delegates from outside Canada, hundreds of whom come with the idea of seeing whether a country which produces such fine poultry would not be a good place for men and women from the over-crowded agricultural areas of Europe. The more citizens from different parts of Canada there are at the Congress the more likely the outside delegates will be to learn something of the different provinces and to take back with them an adequate conception of what the Dominion has to offer.

The Congress will include also many scientists of international reputation in biology, genetics, pathology, zoology, etc. from all the countries of Europe. There will be a large number of British agricultural county agents, and the representatives of the great importing houses of Western Europe. There will be, so to speak, in addition to the world's great experts in all lines of poultry breeding and in the production and marketing of poultry (live and dead), eggs, equipment and supplies. There will, therefore, be every reason to interest all patriotic Canadians, whatever their profession or business.

Representatives of thirty different countries will attend, and there will be one of the greatest displays of poultry ever assembled, in which it is believed Canada's part will not be insignificant. The delegates will be welcomed by His Excellency the Governor-General, and by the Prime Minister, The Minister of Agriculture, the ministers of agriculture of the various provinces, and other prominent citizens are on the congress committee, which has all the details in charge.

The congress officers are: President, Mr. Edward Brown, London, England; director, Mr. F. C. Elford, Dominion Poultry Husbandman; secretary, Mr. Ernest Rhoades, Transportation Building, Ottawa.

Value of Prairie Crops

In 1925 Exceeded World's Gold Output by 270 Million Dollars

The prairie provinces of Canada are richer in their output of wheat and other crops than all the gold mines of the world, according to the National Resources Intelligence Service, of the Department of the Interior, Ottawa, the value of these crops exceeding the total gold output by 270 million dollars. The field crops of the three mid-western provinces were valued at \$60 million dollars in 1925, while the world's gold output was but 260 million dollars.

Split infinitives have been vindicated by a noted grammarian, George Oliver Curme, Northwestern University professor. He says the divided verb form has been used for centuries by the best writers.

WORLD HAPPENINGS BRIEFLY TOLD

Illust stills have been quite numerous in Ontario. During the past three years a single customs and excise preventive officer has unearched 86 stills.

The bill restricting polygamy which is shortly to come before the Egyptian chamber is encountering strong opposition among Moslems, says a Cairo despatch to the Daily Mail.

A government bill is to be introduced in the House of Commons to reduce the postage rate on Canadian daily and weekly newspapers from one and one-half cents to one cent.

A British proposal to extend army limitation to trained reserves was rejected as impracticable by the delegates of France, Japan and Belgium at the preparatory commission for a disarmament conference.

Archbishop Emard for the past five years head of the Roman Catholic diocese of Ottawa is dead. The aged prelate succumbed to a severe heart attack disease which he had suffered for a great time.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at home, as the call for it may come most unexpectedly.

A field ant has been known to hold in its jaws a weight 3,000 times heavier than itself.

Minard's Liniment soothes tired feet.

Snakes are being raised for commercial purposes, in huge concrete pits, by a Los Angeles man.

Women, Here are Facts!

Mrs. Walter Cotes

Woodstock, Ont.—"I have been greatly benefited by taking Dr. Pierce's Favorite Prescription and do not hesitate to recommend it as a woman's tonic and nerve. I was all rundown, weak and nervous—had a draggy, worn-out feeling. I took the 'Prescription' and found it very helpful. It built me up in health and strength and made me feel so well that I would take it again if I were ever in need of a tonic and nerve medicine, for I was very well satisfied with the way it helped me."—Mrs. Walter Cotes, 51 Huron St.

Will Attempt Flight Over Mount Everest

Airman Holding French Height Record Will Use Special Plane

Jean Collazo, the French airman who holds the French height record of 41,811 feet, made in France last August, has sailed for India with a special aeroplane to attempt to fly over Mount Everest.

M. Collazo has obtained the permission of the British Indian government to start from land in British territory and the assistance of one of the British air stations has been promised. He will take the plane out with him by sea and fly from Bombay to Simla, from where he will attempt the flight over the world's biggest mountain, which towers 29,002 feet over the Indian plain.

M. Collazo is taking with him a photographer and will make a special effort to obtain photographs of the unexplored top of the mountain, which will serve as a guide for any future attempt like the Bruce expedition to reach the summit on foot. He expects to make the flight about the end of May or the beginning of June.

BABY'S HEALTH

IN THE PRINC

Can Best be Guarded With Baby's Own Tablets

The Spring is a time of anxiety to parents about the health of their little ones in the home. Conditions make it necessary to keep the baby indoors. He is often confined to overheated, badly ventilated rooms and catches colds which rack his whole system. To guard against this a box of Baby's Own Tablets should be kept in the home and an occasional dose given the baby to keep his stomach and bowels working regularly. This will prevent colds, constipation or colic and keep baby well. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Winnipeg Newspaper Union

MILBURN'S HEART NERVE PILLS

troubled with that complaint again. Price 50c. a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

"That Miss Reed is much older than I thought."

"What makes you think so?"

"Well, I asked her if she had read 'Acson's Fables,' and she said she read them when they first came out."

Innovation At Prague Fair

Popcorn Was Something Entirely New to Czechoslovakians

Popcorn popped over glowing woodcoals drenched with melted butter and served hot to astonished Czechoslovakians was the central feature of the Spring Sample Fair.

Popcorn has never before been seen in this country. The popping is superintended by Elbert Baldwin, American commercial attaché, who also introduced at the fair exhibits of numerous other novel products among which are listed a folding bed, automatic extinguishers, novel automobile parts, road novelties and a two and one-half horse-power motor which it claims can carry.

Goods from all European countries are shown at this exposition.

FOREIGNERS ARE FLEEING FROM INTERIOR CHINA

Shanghai.—With another general strike in the offing and with Shanghai the centre of a continued flight of foreigners from the interior, the defence authorities here made further preparations to protect the international settlement.

A barbed wire barrier now is being constructed along the entire length of the Avenue Edward VII. between the French concession and the international settlement. The Suffolk Regiment also was assigned to guard the offices of the cable companies situated in the Avenue.

The date of the new general strike, which has been decided upon by the general labor union, will be fixed later. There are about 20,000 miscellaneous workers still out from the last strike.

Meanwhile the Japanese naval authorities warned the Cantowest that the Japanese navy will however take drastic steps in the event of unlawful actions by Nationalist soldiers or in the event of firing on Japanese steamers without good cause.

Reports continue of firing on foreign vessels in the Yangtze by Nationalist soldiers on either side of the river. Two British steamers leaving Hankow, which has again become the centre of anti-foreign activities, were fired on. The American destroyer, John D. Ford, which recently came here from Manila, was fired on between Shanghai and Nanking. The destroyer brought its four-inch guns and machine guns into action in reply.

Disquieting reports have been coming from Hankow, scene of anti-foreign disorders some time ago. Advice from a Japanese source in that city said that soldiers in civilian clothes, ruffians and labor pickets were surrounding the city and that the Japanese women and children there will embark on the first available steamer.

Although the great majority of missionaries in the interior of China are now en route for Shanghai, or planning to start soon, about 100 are refusing to leave their posts in the Yangtze Valley, despite the advice of authorities.

Increase In Taxable Value of Property

Statistics Show Figures Higher for Period From 1919 to 1925
Ottawa.—An increase of \$1,303,772, 886 in the total taxable value of real property in Canada is shown for the year 1925 as compared with 1919, according to a report issued by the Dominion Bureau of Statistics.

The total value of taxable property in the Dominion was \$7,331,785,535 in the year under review as against \$6,028,012,619 in 1919.

Personal property, which is only taxed in certain provinces, increased from \$52,939,719 in 1919 to \$56,452,424 in 1925.

Thrown Out

Ottawa.—The private Bills committee of the House of Commons threw out an act to incorporate the "Thou and Islands International Bridge Corporation."

Lower Duty on Livestock

Western Stock Growers Are Asking For Relief

Calgary.—Urging the Dominion to take all available measures to obtain relief from United States duty on livestock entering that country, the Western Stock Growers' Association addressed a resolution to the Federal Government. Another resolution pointed out the necessity for keeping grain and screenings in Canada and prohibiting export of this commodity to the United States. A petition will be submitted to railways asking reduction of rates on horses to an equality with cattle. The Alberta Government was asked for an appropriation for experiments with grazing rotation and rehabilitation of native grasses. Dr. S. F. Tomin told the convention that farmers are "losing ten million dollars a year marketing beef of poor quality," and urged establishment of beef grading to bring this condition.

Attained Terrific Speed

Major Segrave Drives Car 203 Miles Per Hour

New York.—Major Segrave's record of 203.298 miles an hour at Dayton Beach marked the nearest approach to the highest speed man has attained, 275 miles an hour, in an airplane. This air record was set by Floren (in Bonnet), of France, in December, 1924. The fastest mark by rail was that set by an engine in a five-mile run from Fleming to Jacksonville, Fla. in 1901, attaining an average of 129 miles an hour.

On the water, Miss Detroit, in 1920, at Lake George, set a record of 77.80 miles an hour for speed boats, while on the Solent, England, the Maple Leaf II. made 59 miles an hour in 1921.

The record of the Cunard line, Mauretania is 37.04 knots, while that of the Leviathan is 28.94.

Pensions Act

No Further Amendments to Be Made to the Present Act

Ottawa.—"The Government does not intend to extend the present provisions of the pension act by further amendments this year," stated J. H. King, Minister of Health and Soldiers' Civil Re-establishment, in the House.

The present pension legislation said Dr. King, provides pensions for all disabilities "attributed to or incurred during military service," and for "disabilities resulting from injury or disease or the aggravation thereof incurred during military service." No ex-soldier who was so disabled was denied a pension, but responsibility could not be accepted for those whose disabilities were not related to war service.

British Will Protect Colony of Hong Kong

Have No Intention of Diminishing Rights or Authority

Hong Kong.—The British government will give full protection to the colony of Hong Kong and the leased territories on the mainland during the civil warfare in China, according to assurances given by the local secretary of state.

The secretary's communication said the government has no intention of surrendering Hong Kong or abandoning or diminishing in any way British rights or authority in any part of the territories under its administration.

Leaving For Australia

Ottawa.—Hon. Ernest Lapointe, Minister of Justice, leaves Thursday night for Vancouver where he will embark for Australia on April 6. Mr. Lapointe will represent Canada at the opening of the Australian Parliament buildings at Canberra on May the 9th.

Is Made An Indian Chief

Victoria, B.C.—J. H. Excellency Lord Willingdon, Governor-General of Canada, is now Chief Gotschman, or Chief Rainbow, of the Vancouver Island Indian tribes, having been initiated here in one of the most picturesque and colorful ceremonies ever witnessed in this city.

Tallin, Eschelon, has just opened his broadcasting station, and the radio club there already has 500 members.

AMENDMENTS TO GRAIN ACT ARE BEFORE HOUSE

Ottawa.—Amendments to the Canada Grain Act, proposed by the board of grain commissioners, were tabled in the House of Commons, along with correspondence between the Minister of Trade and Commerce and the commission.

On February 5, the minister wrote to the commission asking for suggested amendments. On February 7, Lease H. Boyd, chief commissioner, replied, setting forth the proposals. He stated that the board believed the provisions of the drafted amendments would give the farmer the same privileges as "the Campbell bill," which was before the Commons last session. The commissioner's proposals, however, defined the conditions under which grain might be delivered to a country point if the farmer desired to take delivery of the same and ship it to any specific elevator or point.

The drafted amendments covered the duties of country elevators. While the present grain act grades liabilities as to weights and grades, the commission's proposal covers these two important points and gives the board power to make regulations covering the method of drawing samples. The board, too, could investigate disputes regarding grades and weights. In his letter, Mr. Boyd states that he believes the proposals to be fair and reasonable to all parties.

Spanish-South American Air Service Planned

Will Be Started If German Government Finances Completion of Airship

Berlin.—Airmail service between Spain and South America, starting within 15 months, is predicted by Hugo Eckener, Zeppelin expert, provided the German Government furnishes the remaining 2,000,000 marks necessary for the completion of the airship to be used which is being built in Germany.

Similar agreements are expected to be negotiated with the Argentine and other South American governments. It is planned at first to make a round trip to South America every three weeks, carrying a 15-ton cargo consisting mostly of mails but including some passengers. It is estimated that the flight to South America will require from 75 to 90 hours.

Gain in Employment

Ottawa.—There was a moderate gain in employment at the beginning of March, the upward movement being rather more extensive than in earlier years recorded. The largest increases took place in manufacturing and construction, while logging, mining and trade were seasonally slack.

Trappers Overtake Swift Deer

Many tales have drifted down from the north of how men have overtaken and captured wolves, deer and other swift-footed inhabitants of the woods of Quebec. Readers of such have often been skeptical but the above photograph, taken only a short distance from the Canadian Pacific lines in the Laurentian Mountains, proves that such a thing is possible, in the case of deer at least. Heavy snow, as can be seen, accounts for this and in the pictures above several trappers on snowshoes have succeeded in capturing two animals in question. The deer looking placidly into the camera was no doubt caught only after an exhausting chase through the deep drifts. The little doe that seems to be just an animal for the trapper, will doubtless be admired in a short time by thousands of people in some city park. Trappers in the northern sections of Ontario and Quebec have saved many of these young animals from death by freeing them from heavy drifts of snow, and thus keeping them from packs of hungry wolves.

Matter of Defence Left With Government

Canada Not Bound in Any Way Says Premier King

Ottawa.—"In no way has this Parliament or country been bound by decisions made by the Imperial Conference, last fall," declared Premier W. F. Mackenzie King, in the House of Commons, when he reviewed the reports adopted at the Conference, in London. Referring to the question of defence, Premier King declared that no commitments had been made on behalf of Canada with respect to defence, and no request had been made on behalf of the British Government in the matter. It was for each Dominion, through its own government and parliament, to decide.

"It is for this Parliament to say to what extent Canada will take in all matters pertaining to defence," said the Premier.

Manitoba Liberal Leader

Judge Hugh A. Robson Elected to Succeed Hon. C. Norris
Winipeg.—Judge Hugh A. Robson, K.C., prominent in the public life of the West for many years, is the new leader of the provincial Liberal party. He was elected to succeed Hon. T. C. Norris, who tendered his resignation a year ago, at a party convention held here.

Judge Robson was elected from a slate of several nominees, including Fred C. Hamilton, former president of the provincial Liberal Association. Mr. Norris who is the leader of the Liberal group in the Legislature, was nominated, but withdrew his name.

Judge Robson, who was born in Barrow-in-Furness, England, in 1871, came to Canada in 1882, and is a pioneer resident of Winipeg.

Death of Sir Charles Tupper

Was One of Canada's Most Distinguished Elder Statesmen

Vancouver.—Hon. Sir Charles Tupper, K.C.M.G., K.C.L.I., died at his home here following an attack of pneumonia which had confined him to his home for nearly two weeks.

Sir Charles, was one of Canada's most distinguished statesmen. He was born in Amherst, N.S. in 1855 the son of the late Right Hon. Sir Charles Tupper at one time prime minister of the Dominion.

Salt For Dyspepsia

Washington.—Common salt is as effective as any other remedy for dyspepsia, according to reports of research of the University of Melbourne, Australia, recently received here. Dr. F. A. Appleby has found that common salt helps certain types of plain dyspepsia.

Betting Bill Defeated

London.—An attempt to introduce a bill in the House of Commons to legalize betting in England was defeated by a vote of 116 to 11.

THE EQUALITY OF STATUS BINDING BRITISH EMPIRE

Ottawa.—Hon. Ernest Lapointe, Minister of Justice and chairman of the Imperial Conference committee on treaty-making powers, continued the House debate on the Imperial Conference. Mr. Lapointe was emphatic that the Imperial conference of 1925 had no authority to change one iota of the British North America Act or any constitution of the Empire. What the conference did, Mr. Lapointe exclaimed, was to crystallize "the principle of equality of status, which was already recognized and which was the logical outcome of the development of the various nations. It published a definite, clear and official authority to that principle, it did that in such a way as to make it the greatest contribution to the permanency of the free association of the nations of the Empire. It is the final and unequivocal acceptance of the principle of unity and liberty, unity-powered and enshrined in the British throne and liberty in all domestic and external activities of the various nations of the commonwealth. It is no longer the case of

"A daughter am I in my mother's house, but misters in my own."

"The family is a family of sister, equal in their rights and activities."

And, concluding his speech, Mr. Lapointe declared, to words of Liberal applause, that the principles underlying the pact would illumine the way to peace, progress and nationhood.

Many Claimants to Millions

Dutch Merchant's Fortune Has Drawn Interest for 200 Years

Adelaide, Australia.—A fortune of \$200,000,000 which has been accruing at interest for 200 years, is to be subject of issue in the courts, according to claims that are now being filed here.

Edward Webber, merchant prince of Holland in the days when the Dutch flag was supreme in the world of commerce, died in New York leaving an enormous will, bequeathing an enormous sum to his seventh generation, claims assert.

The fortune, which has now grown to \$500,000,000, may create at least 150 Australian millionaires for more than that number in the city of Adelaide alone claim a share.

The claimants are calling a meeting to discuss the matter.

Harvesters From Oxford

University Students Plan "to Help Canadian Farmers This Year"

Oxford.—Oxford University students are planning to help harvest the Canadian wheat crop next summer. Parties of students are being recruited under the joint auspices of the Canadian government and a Canadian railway. They will sail in July for Montreal and will work on Ontario farms until the middle of August, moving on later to Manitoba and returning to England for the re-opening of college in October.

New Home For Canada's Oldest University

Cut Shows Assembly of King's College Buildings. Inset: His Excellency, Viscount Willingdon, Governor General of Canada.

After 137 years of higher educa-
tional work in Nova Scotia, King's
College, Canada's oldest university,
is to have a new home. The above
drawing shows the proposed build-
ings, which will resemble in char-
acter Oxford University, to be built
as soon as the present campaign
has attained its desired objective.
King's University stands as the
only real monument in Nova Scotia
to the United Empire Loyalist
pioneers. In 1783 the U. E. L.'s who
had come to the Dominion from New
York planted an "acorn" in the es-
tablishment at Windsor, Nova
Scotia, of King's College. Full
University powers were granted in
1802 by Royal Charter, which was
the first one received outside of the
British Isles. From a dream in the

souls of those pioneer Loyalists
King's has reached a recognized
and honored place in the Dominion.

Many famous Canadians have been
Kingsmen. Sir James Cochrane, Sir
Frederick Borden, Judge Thomas
Chandler Halliburton (Sam Slick),
Beall King, Rev. H. A. Cody, and
Canon Allan P. Shaford, are a few
of King's products.

In 1923 King's took the first step
towards a confederation of Maritime
Colleges; the College was removed
to Halifax and became associated
with Dalhousie University.

A year ago King's launched a
campaign for \$500,000, having re-
ceived a promise from the Carnegie
Corporation of \$200,000 conditional
upon the raising of the first amount.
Up to date the total pledged in the

Maritime Provinces, Ontario, Quebec
and England is \$340,300, and only
\$100,000 more is needed.
His Excellency, Viscount Willing-
don, Governor-General of Canada,
has accepted the office of Patron of
the Rebuilding and Endowment
Fund.

Here and There

When the internal trouble which
has been devastating China for the
last two years subsides, a tremen-
dous market will open up for Cana-
dian wheat in that country, according
to J. E. Scott, representing a
large British firm at Hong Kong,
on his way back to London to report.

Bounties paid for bob-cats in
New Brunswick, by the Depart-
ment of Lands and Mines, have so
far exceeded the figures for the cor-
responding period of last year,
according to L. A. Gagnon, chief
game warden, who states that wild
cats are being killed in greater num-
bers each year.

Ontario buyers of milk cows have
about completed the purchase of five
carloads of Guernsey cows from Col-
chester, Cumberland and Pictou
counties. The buyers are Anderson
Brothers and Messrs. Graham and
Caldwell from the Hamilton districts.

The first auction sale of horses
that has taken place in Montreal for
some years was opened at the East
End Stock Markets, March 23.
Stabling was put at 362 horses and
it was stated that approximately 200
horses were sold. The demand was
mostly for heavy draught horses,
Percherons, Clydesdales and the like,
for carters and for lumbering pur-
poses, coming chiefly from Alberta
and Saskatchewan, and some from the
middle west.

Consequent upon an agreement
reached at a general conference of
Canadian and United States tele-
graph companies the Canadian Pacific
Telegraphs have announced that
code words will be accepted at all
their offices in future for day and
night letters. This departure will af-
fect both Canadian and international
business, the companies concerned
being: the Postal-Telegraph Com-
pany, the Canadian Pacific Tele-
graphs, the Canadian National Tele-
graphs and the Western Union Tele-
graph company.

The development of a new indus-
try from the propagation of musk-
rats and other water fur-bearing
animals, in land and water areas,
leased from the Province of Alberta
through agreement with the Do-
minion Government, was indicated
by Hon. George Hoadley, Minister
of Agriculture, in committee dis-
cussion in the Alberta Legislature.
The amendment would give the Gov-
ernment power to regulate and
license fur and game farms, and to
lease the Dominion water and land
areas for the propagation of such
animals.

A keen competitor to Betsy Wiley,
the Nova Scotia world's champion
milk and butter producer, has been
discovered at Fox River, Cumber-
land County. Mr. Henry S. Kerr
of this place, claims that he owns the
champion butter producing cow in
her class. This cow is a grade Ayr-
shire and Durham cow, which has
just recently freshened. In one week
she produced 392 lbs. of milk, which
churned 20 1/2 lbs. of butter, after
deducting approximately 12 quarts
of milk and 1 1/2 quarts of cream for
home consumption. This record is
creating keen interest.

Following upon his recent an-
nouncement to the effect that a To-
ronto firm of architects would be
employed in connection with the
erection of the new Canadian Pa-
cific Hotel in that city, E. W. Beatty,
Chairman and President of the
Canadian Pacific Railway, recently
stated that Messrs. Spragg and
Ralph had been appointed asso-
ciates with the firm of Ross and
Macdonald, of Montreal, to handle
this work. Messrs. Ross and Mac-
donald have been employed in Cana-
dian Pacific work for some time, the
latest of their buildings being the
company's new hotel at Regina. It
is desired that the new hotel shall
be thoroughly representative of the
city in which it stands and the ap-
pointment of a firm of Toronto
purpose.

CANADIAN NATIONAL EUROPEAN TOURS.

A maximum of travel thru par-
ticularly interesting countries at a
minimum of expense is provided in
the Canadian National Education
at tours this summer thru Scot-
land, England, France, Belgium,
Switzerland and Italy.

Two tours have been arranged
and sailing will be made from
Montreal, July 8, on the S.S. "An-
dania," direct to Glasgow. Very
careful attention has been given
to the itineraries involved.

Tour No. 1 is a 37 day trip on
sea and land, visiting important
cities in Scotland, England, Bel-
gium, France, Switzerland. All
expenses, \$372.50, Montreal to
Great Britain and the Continent
and return to Montreal.

There will be low excursion
fares to the seaboard from points
in the Prairie Provinces.

These tours will be personally
conducted from Western Canada,
and while overseas will be under
the direct care and supervision of
thoroughly responsible and reliable or-
ganisation, fully qualified in every
particular to successfully look after
the interests of our patrons.

The sight-seeing program is very
complete and generous. Motor
coaches and automobiles are freely
used. All sight-seeing is well plan-
ned to save unnecessary fatigue
and to see the worth while places
within the time at our disposal.
Competent lecturers will reveal to
our patrons the outstanding fea-
tures, literary, historic, artistic or
scenic of the Old World centres
visited. J. W. McCulla, phone 28,
local agent for the Canadian Na-
tional Railways, will be glad to
discuss these tours and arrange all
details.

CHAPTER XXXII.—(Continued)

There was an instant babel of voices, and the rustle of those who, for their various reasons, must attempt the descent, rather than remain at La Turbie during the night. Brandon, who had risen from his table, watched Joanna and Kenilworth. He saw that both of them turned immediately toward the foyer where Joanna had left her wrap. Then he slipped out the door and went to the big car in which Antoine awaited.

"As I expected," he said to the Monegasque, "she will not remain. Be ready to pull out when they approach their car. We want not more than two or three cars between us."

When Kenilworth and Joanna came out, many of the cars in the yard had already vanished in the fog, their horns echoing up from the road monotonously. An attendant was ordering departures, insisting upon an interval of two minutes between them. Brandon waited until Joanna, her wrap held close about her, her mask in her hand now, had slipped into the next beside Kenilworth. Then he touched Antoine's arm, and at the next signal from the starter, the big car slid away.

In the smaller car Kenilworth remarked grimly: "Till this is a test of nerve but we'll make it if anyone does." The girl seemed to detect a note of dejection in his tone. She slipped her hand under his arm.

"I'm sorry, Roddy," she said. "You were wonderful, and I am consoled enough to think you meant all that you said. But you just didn't sweep me off my feet as I thought you might. I suppose there must be something old fashioned about me after all. Your arms are awfully comforting, my dear, but I couldn't have the feeling that the thorns would just have to grow on them. I know you didn't love me, but I couldn't help it. I feel better, for it, too. I'm sure of myself, anyway."

"I don't know," he said, "but what you've got the right idea at that. Better than mine. I almost asked you to marry me, and that's wholly against my principles."

"I'm glad you didn't," she returned. "I'm afraid I might have given in to that."

The starter appeared at their running board and asked them to proceed. They crept noiselessly out of the parking yard. Until they came to the first turn, some sixty yards away, the floor lights from the club house aided them. Then, when he had swerved sharply to the left they were, wrapped in wet, almost impenetrable obscurity. Ahead they could see only the faint glimmer of their own headlights.

Twice they bumped into cars stalled at the inner side of the road. Each time they were called out by members of a party going back afoot—even women in fragile slippers and delicate gowns already soggy from the damp—rather than fight the descent any longer.

The red car nosing downward at a snail's pace, struck a stump. "It was foolish of me to let you attempt to go down," Joanna declared. "Before we are too far away we must walk back. The car will be as safe at the side of the road as are the others being abandoned."

"If we have to walk," Kenilworth replied firmly, "it will be straight ahead. I'll get you down if I have to carry you."

"But it's utterly folly!" she protested. At that moment another group, two women and a man stumbled by them, feeling their way back to the summit. "See," she exclaimed, "there are more who have given it up. We can walk back, dry out and wait for daylight. People below will understand."

He stubbornly negotiated another corner. When the car was crawling again he spoke, grimly.

"There isn't enough charity in the whole world—in the part of it you and I inhabit—to make room for any sort of decent understanding of how a pretty woman might be caught and remain till daylight on La Turbie. You can stand a mysterious escapade in the night with Prince Michael, but not with me in the mist at a mountain top club house where

you have to wear a mask to save your face! Some could; with some it wouldn't matter; you couldn't and you couldn't."

She bit her lip, and was silent. With a petulant gesture she brushed away the moisture that hung in great, glinting beads on her eyelashes. Suddenly she was startled by a light that appeared weirdly in the middle of the road almost at their front wheels, waving slowly to the right and left.

"Somebody smashed I suppose," Kenilworth muttered and, jamming in his brakes, brought the car to a stop. Heavy, forbidding faces emerged from the fog on either side of them. Joanna cried out, Kenilworth with an oath, lunged across at the head of a man who reached in to help, but his arms were seized in an iron grip and twisted dexterously behind him. A guttural voice, speaking a mixture of Monegasque and French, commanded:

"Montez! and Mademoiselle will be good enough to step from the car."

"Like—!" Kenilworth exclaimed, and struggled, but the grip on his arms left him powerless. The lantern was brought closer. By its pale light they saw that a dozen men surrounded the car and that firearms gleamed dully in their hands.

After her first cry of alarm Joanna sat rigid. Something of her right shone in her eyes, and Kenilworth was conscious that her face was pale. Otherwise she gave no sign. The gruff voice of the leader of the evil crew was heard again:

"It was ordered that you both descend. We have not great patience. The mademoiselle need not fear." Kenilworth addressed Joanna to step out quietly. "We must go through it I suppose," he grumbled. "They probably will rob us with a thousand pardons and then politely let us go. These mountain brigands are thorough gentlemen as a rule."

The one who had been holding on to Joanna's wrists released them when she was in the road. She ran around the car to Kenilworth's side and from this position glared defiantly at the footpads who surrounded them. One of them caught the red sparkle of the enormous ruby that lay against her throat, fixing his eyes on her. She instinctively flung up her hand to her throat, but he smiled and bowed gallantly. "A pretty thing, mademoiselle," he said in the native patois, "Mademoiselle's neck does not require such an ornament however."

Kenilworth cursed at him, which only brought another ironic bow. The men closed in around the pair and they were ordered to walk with them. They were marched off the road past a hut which Kenilworth recognized as the one before which the big cabaret of the hotel stood. The position of their ascent, had stopped and dropped behind them. Behind the hut they entered a cluster of pine trees and then crossed an open space of some bush scrub. A low barn-like building loomed in the dim light before them, and they were ushered through a narrow door.

Inside the building was a startling scene. In the dim light shied by a dozen lanterns placed about the curtain floor, they beheld a dozen men and women whose costumes and dominoes proved to have been revelers at the club house, lined up against the walls, the men standing stiffly at one side, their hands bound behind them, women in an excited group. Armed ruffians guarded the women at one side, and the sudden men at the other. Kenilworth was ordered to take his place among the men. For a brief moment he gave a sign of attempting flight, but Joanna murmured a reassuring word to him and without awaiting the command from their captors, moved over to join the group of women.

As Kenilworth had prophesied, the bandits robbed their victims with profuse apologies uttered in their guttural tones. They seemed however, to be strangely inefficient in their plundering. The man whose hands explored Kenilworth's inner pockets did not discover his wallet, in which was a sizeable sheaf of bank notes, nor his platinum and diamond studded watch in the watch pocket beneath his waistcoat. A few gold loaves, and an English pound note in his change pocket was confiscated. His pearl dress studs were not noticed. Carefully he observed that the other men of obvious valuables, ignored costly pearl studs. On the lapel of one victim, a

"I want to help" says Allen Boudria

Tells facts from own experience to help others. Almost wild with pain, weak and rundown, he won new health and strength through Tanlac

Allen Boudria, engineer, of 432 St. Patrick St., is one of Ottawa's best known citizens. "My purpose in telling the facts of my experience," he said, "is to help others who suffer as I did."

For five years I was in misery. My whole system seemed out of gear, but my stomach troubled most. Even a drink of cold water would cause my stomach to bloat and swell abnormally. It would prevent me from sleeping at night so that I had to get up and walk the floor for hours. Violent stomach pains nearly drove me wild. I've seen times when I was doubled over, unable to straighten up.

My friend M. Lejeune told me how Tanlac had helped him out of similar trouble, so I got some and used it in the same way. I just made one. I feel 30 years younger than I am, and weigh 150 lbs. My appetite and sleep are both fine. I eat what I like and sleep like a top. Tanlac and nothing

else, made this great change. I'm for Tanlac.

If overwork or neglect have worn you down get Tanlac, the great natural tonic made from roots, herbs and barks. Your druggist has it. Over 82 million bottles sold.

tiny decoration built around a huge diamond, was unnoticed.

(To be continued.)

A GOOD MEDICINE FOR SPRING TIME

Do Not Use Harsh Purgatives—

—A Tonic is All You Need

Not sick—but not feeling quite well. That is the way most people feel in the spring. They are easily tired, appetite flake, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuritis. Any of these indicate that the blood is out of order, that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. The doctor will tell you this is true. What you need in the spring is a tonic that will enrich the blood, build up the nerves. Dr. Williams' Pink Pills do this speedily and surely. Every dose of this medicine helps to enrich the blood which clears the skin, strengthens the appetite and makes tired, depressed men, women, active and strong. Mr. James Dickson, West-north, Ont., says:—"It was quite bad for me, easily tired, and appetite poor. My blood seemed thin and watery. I decided to try Dr. Williams' Pink Pills, and after taking a few boxes I felt myself thoroughly built up and as strong as ever. I can recommend the pills to run-down people."

You can get these pills through any medicine store, or mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Mystery of the Towers

Built in England During the War But Were Never Used

The mystery of two huge towers, built on the east coast of England during the war and never used, has been cleared up.

The towers, 30 feet high and built at a cost of approximately \$5,000,000 each, were to be the fortifications of a new kind of defense of the English Channel.

They were to be towed out to sea and strung together across the Straits of Dover, linked together at distances of a few hundred yards with nets and in the heavily fortified guns. The top of each a powerful searchlight was to be placed.

The armistice, however, made it unnecessary to continue the scheme and the towers were anchored off Shoreham for some years. One has been broken up and the other is used as a lighthouse off Spithard.

According to Sir W. Arbuthnot Lane noted British surgeon, fair-haired persons are more likely to fight against disease than dark-haired ones.

Not Always a Good Rule

The idea that a man is as old as his birthday is one that is fast disappearing. There are too many eminent men beyond the palmist's span to hold to such a principle. Birthdays, alone, are poor way to judge a man or a woman. Many men of ripe years are also ripe later and judgment, while many men and women never reach that stage.

It is suggested that judges be compulsorily retired when they have reached the age of seventy-five years. That does not seem to be a good rule. A judge, particularly a man, may gain a wide outlook in his service which would be missed on the bench.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with will cause the child to die. Dr. Williams' Pink Pills do both kinds and while expelling them from the system serve to repair the damage they have caused.

Little Helps For This Week

If you love Me, keep My commandments.—John xiv. 15.

Do as thou wouldst be done unto; Love God, and love thy neighbor; watch and pray. These are the words and works of Him; this do.

And live; who doeth not this hath lost heaven's way.

—Henry Vaughan.

When a man is told that the whole of religion and morality is summed up in the two commandments,—to love God and to love our neighbor, he is ready to cry, like Charaba in Gebir, at the first sight of the sea, "Is this the mighty ocean? Is this all? Yes, all; but how small a part of it of your eyes survey! Only trust yourself to it, launch out upon it sail abroad over it, you will find it has no end; it will carry you round the world."

—Julius Hare.

HAVE GLOSSY HAIR

Minard's makes your hair soft and lustrous. Stimulates growth. Use as a tonic.

There is an automobile for every five persons in the United States. At this rate there is one for almost every family.

Free Treatments For DEAFNESS

Hear Noises from Nasal Catarrh

Hearing Restored

I have an original home treatment for deafness and head noises caused primarily by nasal catarrh which I want every sufferer to try free—without obligation. For many years I suffered from catarrhal deafness and head noises. I perfected a treatment which completely restored my hearing. I gave it to others and they were able to hear again. Since that time, hundreds have used it successfully.

Dr. W. O. Coffee

25,000 Treatments To Be GIVEN AWAY This Month

These treatments cost you nothing. The results are quick and convincing. You will feel the difference the first day. I have found that head noises are caused primarily by nasal catarrh, which is a disease of the mucous membrane and many other troubles. Usually one can be cured by the use of the treatment. I have never received until the other ear is affected. I have restored hearing in many extreme cases where men have been deaf for years. I have many men who have been deaf for many years who have been cured. Write for many cases.

DR. W. O. COFFEE, Suite 2112, St. James Hotel Bldg., Davenport, Ia.

Try It Free

I feel so sure that this treatment will restore hearing and head noises from nasal catarrh that I want every sufferer to try it free. I want to prove at my expense that the results are quick and convincing.

It is the best treatment that I have found in 42 years' practice as eye, ear, nose and throat specialist.

FREE

of other instances similar to these have told me of the treatment's success.

In addition, I will send you absolutely free a copy of my book, "Nasal Catarrh," which is a complete guide to the cure of all the troubles of the nose and throat.

Write today for this free test treatment. I will send you a copy of my book, "Nasal Catarrh," and a nasal catarrh or head catarrh. Write or print your name and address on a postcard. The whole mail will not exceed 10 cents. For 50 days I am sending it free.

Mr. John Schultz

Wishes to announce that he has taken over the dairy herd of Mr Chas. Schultz, and intends to supply the residents of the town of Stony Plain daily with fresh, pure, government tested and inspected for health and cleanness milk and cream.

The co-operation of the residents is greatly appreciated. I intend to maintain the best possible service. Yours truly,

JOHN SCHULTZ

Wheat Pool News Notes.

Broomhall, the British grain authority, cables that the Canada pool is selling wheat in Britain at a premium of . from 14 cents to 15 cents above prices for Argentine and Australian wheat.

In his first interview following his arrival in Washington as Canadian ambassador to the United States, Vincent Massey told the newspaper representative how the Canadian farmers are finding in co-operation cure for their financial troubles. The formation of the wheat pool is a tremendous tribute to the resourcefulness and community spirit of the Canadian farmer, Mr. Massey said.

The Alberta Wheat Pool is broadcasting Pool information from three Alberta radio broadcasting stations, namely the Calgary Herald, the Edmonton Journal and the W.W. Grant Radio Co. The first broadcast was made from the Calgary Herald station on Thursday, March 10.

Since the formation of Wheat Pools in Western Canada over half a billion dollars has been distributed to Pool members by the organization.

Spruce Grove News

Mr H A Baron, who has been farming north and east of the Grove, held a clearance sale yesterday of his stock and machinery. Mr Baron will take up his residence in Edmonton.

Herman Loeblich, the well-known ball player, has under consideration a very flattering offer from the manager of a ball team in a Coast city.

A record crowd of local people took advantage of the "shopping special" train service on Friday last.

Farmers along the Baseline are having a busy time pulling motorists out of the mud holes.

Ish Kobebbel!

Izzy (on board ship)—"Hey, Hey, der boat's vor sinkin'!"
Ikey—"Vell, vot do I care! Itt don't belong to me!"

Supposin' He Had Done So?

Robert was sitting listlessly in the class, chewing gum. He was reclining on the back of his apine, and as he sat in the front seat, his feet reached out almost to the teacher's desk. Suddenly the teacher exclaimed angrily: "Robert! Take that gum out of your mouth and put your feet in!"
